

Your Cyber Security Services Team.

Let our team of cyber security professionals reduce risks while reducing costs.

Cyber Security Services and Product Expertise On-Demand

DID YOU KNOW?

THERE WERE 1,926,362,102 RECORDS BREACHED IN 2017

Almost 2 Billion records breached in one year alone. There are common ways that organizations could have prevented this from happening.

ON AVERAGE A DATA BREACH COSTS \$217 PER RECORD BREACHED

Improved detection, mitigation and incident response is often key in prevention and reducing costs.

IDENTIFYING A DATA BREACH TOOK AN AVERAGE OF 191 DAYS

It is important to have a team of cyber security professionals ready to detect and block threats as they happen.

MOST SUCCESSFUL ATTACKS START WITH VULNERABILITY PROBING

An attack can be detected well in advance of a data breach with the proper monitoring in place.

PORTFOLIO OF SERVICES

Virtual CISO Services (vCISO)

When you subscribe to our Virtual CISO Services, you will have a dedicated vCISO or Chief Information Security Officer. This professional will work to drive the cyber security program to the next level. We have on-demand, part-time, and full-time professionals that can assist. Cyber Security Services offers an all-inclusive Virtual CISO service that provides an out-of-the-box Information Security Program.

Cyber Security Consultants

We have remote and onsite Cyber Security Consultants to assist with projects or operational activities you need throughout the year. Our team is ready to assist in the event of a data breach, or other cyber security event. We have Cyber Security Consultants that are trained on the top security products. Our goal is to be your partner that you can call for immediate assistance on compliance, risk, and information security challenges.

Penetration Testing Services

It is important to have a penetration test at least on an annual basis. At Cyber Security Services, we can also offer monthly vulnerability checks without additional costs. We strive to make sure attackers do not have an easy access route to your data.

Network Penetration Testing
Wireless Penetration Testing
Social Engineering Testing
OWASP Penetration Testing
Physical Security Assessments*

Network Security Monitoring and Threat Action

At Cyber Security Services our SOC team will monitor your critical assets 24x7x365. We not only alert you to threats in your environment, but a Cyber Security Analyst can also act on a threat while you sleep. We have real individuals performing reviews to determine if an attack warrants a response.
